

Innovative Opportunity for a Cardiology Nurse Practitioner

We are launching a groundbreaking clinic that will revolutionize patient care. The Day Clinic is a pioneering ambulatory care model focused on transforming heart failure management by offering a clinic-based alternative to hospitalization. No longer will heart failure patients be sent for long wait times in the emergency room only to be admitted for days.

Most importantly, our clinic culture is defined by one powerful word: compassion. We will treat our patients with unmatched skill and clinical expertise, but it will be our compassion for our patients and for their caregivers that will be our super power.

We are building an environment where every action—from delivering evidence-based care to empowering patients and caregivers—aims to make a meaningful, positive difference in the lives we touch. This is a place where the team feels fulfillment, has agency, and the satisfaction of leading transformative change in heart failure care.

We are seeking a dynamic and visionary cardiology nurse practitioner to join us on this exciting journey. This is a unique opportunity for an individual with a passion for healthcare innovation and a desire to make a meaningful impact on the lives of patients. This is more than a clinical role. As a leader in the company, you will play a pivotal role in shaping the direction of the venture and contribute to building it from the ground up.

Key Responsibilities:

- Manage a patient panel of 5 to 15 per day

- Conduct comprehensive physical exams and health assessments to diagnose and treat acute and chronic conditions.

- Collaborate closely with the founders to define the strategic vision and mission of the novel heart failure clinic.

- Lead the development and implementation of clinic policies and procedures to enhance patient outcomes and experiences.

- Oversee the day-to-day operations of the clinic, ensuring high-quality and efficient healthcare services.

- Work with the founders to build and nurture relationships with key stakeholders, including hospitals and insurance companies to create viable financial models.

Work with the founders to drive business development and growth strategies to maximize the clinic's impact and financial success.

Over time, you will help hire and manage additional clinical and administrative staff as well as help scale up operations.

Qualifications:

- Cardiology nurse practitioner with training in advanced heart failure and/or significant experience treating heart failure patients
- Prior experience in building a practice is a plus but not required
- Master of Science in Nursing (MSN) or Doctor of Nursing Practice (DNP)
- AANP or ANCC Certified
- Active, unrestricted state license (or ability to obtain)
- Active DEA license
- US Work Authorization
- Entrepreneurial mindset and a passion for driving innovation in healthcare
- Excellent interpersonal and communication skills.
- Strong leadership skills with the ability to thrive in a fast-paced and dynamic startup environment.

The ideal candidate would be located in (or willing to move to) the greater Washington DC/Baltimore area

What We Offer:

- Salary range of \$125,000 - \$160,000 with potential for performance-based incentives
- Health, Employer matched 401k, Paid-Time-Off, CME Stipend
- An opportunity to co-create and shape the future of healthcare.
- Possibility for ownership stake in the venture.
- A collaborative and innovative work environment.
- The chance to make a meaningful impact on patients' lives.

If you are a highly motivated and forward-thinking individual with a passion for healthcare innovation, we would love to hear from you. Please email ryan@mydayclinic.com with your CV and a short note (<500 words) on why you'd be a fit for this job.
